Profile

I'm an innovative Frontend Developer with two years of hands-on experience building and maintaining websites and web applications. I am Proficient in HTML, CSS, and JavaScript, as well as efficient use of modern libraries and frameworks such as React.js and Nextjs.

I possess excellent interpersonal skills, having the ability to establish a collaborative environment and dedication to teamwork. Passionate to develop my skill set and embrace modern technologies for professional growth.

Work Experience

Phasecurve Technology

Victoria Island, Lagos Nigeria

Frontend Developer (FullTime)

June 2022 - present

- Actively participate in Agile Scrum Methodology, including daily stand-ups, sprint planning, sprint reviews, and retrospectives.
- I championed the initiative to develop and revamp company website pages, introducing a seamless payment signup system directly on the website. This strategic implementation drove an impressive 70% increase in user engagement and sales drive of the company.
- I collaborated with the development team in the implementation of design components that renders the user dashboard interface such as user profile, settings, and data display.
- In order to enable seamless integration, I worked closely with the backend team to make sure that the required endpoints for HTTPS requests were available.
- One of my major tasks was developing error handling techniques to handle situations like unsuccessful requests or problems retrieving data from the backend and provide the user the appropriate error messages for a better user experience.
- I utilized state management libraries like Redux ToolKit to ensure accurate rendering of data upon fetching and updating.
- I worked extensively with UI/UX designers to make sure the designs were practical and effective from a technological standpoint.

Identitypass By Prembly

Remote

Front End Developer (Intern),

Mar 2022 - May 2022

- I build a user dashboard with dynamic capabilities to utilize GraphQL queries to retrieve user data from an API endpoint. Implemented GraphQL queries to efficiently retrieve data and displayed it on cards within the dashboard interface.
- Participating actively in Agile sprint procedures which includes code reviews, to maintain code quality and compliance to Agile coding standards.
- Collaborating with the design team to understand project requirements and contribute to the creation of user-friendly interfaces.
